

FIRE ALERT SYSTEM

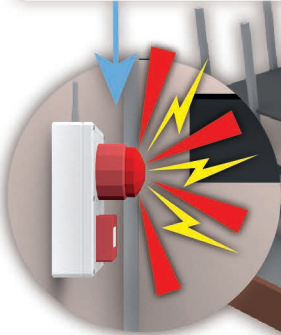

- **Complies with new EU legislation regarding audio & visual alerts**
- **Rapidly deployable with no wires or cabling**
- **PC app allows you to locate and monitor activated units**
- **Sounds a simple alert alongside a visual flashing beacon**
- **Various models to choose from**
- **1km transmission between units**
- **Long battery life of up to 3 years**

FIRE ALERT SYSTEM

When activated, an audible alert is sounded alongside a visual flashing beacon. Decibel levels can be individually set to suit the environment

An IP Receiver can be added to the system so that call points can be monitored and controlled from one central location using the PC app

IP66 weatherproof external units are available with robust 1 km transmission range
